

Business Analysis - RentSafeTO-evaluation-view.csv

How are Toronto rental apartment buildings scoring on RentSafeTO evaluations, which parts of the building are losing points, and what is likely to come next?

Bottom line: Volume +66.4% on the year before, graded WATCH; total refused_items +68.8%, graded WATCH; average current_score +0.6%, graded WATCH; average entry_score -0.1%, graded WATCH; average envelope_score -1.2%, graded WATCH; average grounds_score +1.2%, graded WATCH; average interiors_score +0.4%, graded WATCH; average paperwork_score +2.9%, graded WATCH; average proactive_score +0.7%, graded WATCH; average refused_items -0.175, graded WATCH; average stairs_score +1.4%, graded WATCH; average systems_score +0.1%, graded WATCH; average waste_score +2.2%, graded WATCH. [fact: measure.refused_items.total.change, measure.volume.change_pct, measure.current_score.change, measure.entry_score.change, measure.envelope_score.change, measure.grounds_score.change, measure.interiors_score.change, measure.paperwork_score.change, measure.proactive_score.change, measure.refused_items.change, measure.stairs_score.change, measure.systems_score.change, measure.waste_score.change]

Nothing in this run was graded CONFIRMED or cleared for planning, so this brief recommends no action. 13 signals on watch, 2 questions the data cannot answer.

What happened

- The monthly total of refused_items moved from 202 in the year before to 341 in the latest year, a change of +68.8%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.refused_items.total.change, measure.refused_items.total.prior12, measure.refused_items.total.last12]
- Row volume changed by +66.4% in the latest year (2,044 rows) against the year before (1,228 rows). No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.volume.change_pct, measure.volume.last12, measure.volume.prior12]
- Average current_score (the average month) moved from 89.5 in the year before to 90.1 in the latest year, a change of +0.6%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. 2 rows of current_score are extreme (the largest is 18 against a median of 92). Without them the change is +0.7%. [fact: measure.current_score.change, measure.current_score.prior12_mean, measure.current_score.last12_mean, measure.current_score.extreme_rows, measure.current_score.extreme_rows.largest, measure.current_score.median24, measure.current_score.change_without_extremes]
- Average entry_score (the average month) moved from 94.6 in the year before to 94.5 in the latest year, a change of -0.1%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.entry_score.change, measure.entry_score.prior12_mean, measure.entry_score.last12_mean]
- Average envelope_score (the average month) moved from 87.2 in the year before to 86.1 in the latest year, a change of -1.2%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.envelope_score.change, measure.envelope_score.prior12_mean, measure.envelope_score.last12_mean]
- Average grounds_score (the average month) moved from 88.6 in the year before to 89.7 in the latest year, a change of +1.2%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.grounds_score.change, measure.grounds_score.prior12_mean, measure.grounds_score.last12_mean]

- Average interiors_score (the average month) moved from 88.4 in the year before to 88.8 in the latest year, a change of +0.4%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.interiors_score.change, measure.interiors_score.prior12_mean, measure.interiors_score.last12_mean]
- Average paperwork_score (the average month) moved from 90.1 in the year before to 92.7 in the latest year, a change of +2.9%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.paperwork_score.change, measure.paperwork_score.prior12_mean, measure.paperwork_score.last12_mean]
- Average proactive_score (the average month) moved from 89.6 in the year before to 90.3 in the latest year, a change of +0.7%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. 2 rows of proactive_score are extreme (the largest is 18 against a median of 92). Without them the change is +0.8%. [fact: measure.proactive_score.change, measure.proactive_score.prior12_mean, measure.proactive_score.last12_mean, measure.proactive_score.extreme_rows, measure.proactive_score.extreme_rows.largest, measure.proactive_score.median24, measure.proactive_score.change_without_extremes]
- Average refused_items (the average month) moved from 0.338 in the year before to 0.163 in the latest year, a change of -0.175. No chance test was run. This is graded WATCH because it has no percentage change (its monthly averages are at or below zero), so no change test could be run: watch it, do not act on it yet. [fact: measure.refused_items.change, measure.refused_items.prior12_mean, measure.refused_items.last12_mean]
- Average stairs_score (the average month) moved from 86.2 in the year before to 87.4 in the latest year, a change of +1.4%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.stairs_score.change, measure.stairs_score.prior12_mean, measure.stairs_score.last12_mean]
- Average systems_score (the average month) moved from 94.2 in the year before to 94.2 in the latest year, a change of +0.1%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.systems_score.change, measure.systems_score.prior12_mean, measure.systems_score.last12_mean]
- Average waste_score (the average month) moved from 91.6 in the year before to 93.6 in the latest year, a change of +2.2%. No chance test was run. This is graded WATCH because no statistical test could be run on the change: watch it, do not act on it yet. [fact: measure.waste_score.change, measure.waste_score.prior12_mean, measure.waste_score.last12_mean]
- The most common decade_built value is '1960s', with 33.3% of rows. [fact: measure.decade_built.share.1]
- The most common district value is 'Toronto and East York', with 39.7% of rows. [fact: measure.district.share.1]
- The most common property_type value is 'PRIVATE', with 84.3% of rows. [fact: measure.property_type.share.1]
- The most common storeys_band value is '3-4', with 51.1% of rows. [fact: measure.storeys_band.share.1]
- The most common ward_name value is 'Toronto-St. Paul's', with 9.7% of rows. [fact: measure.ward_name.share.1]
- Left out of every figure above: 366 rows dated after the analysis window (the last month in the file (2026-09) holds the analysis date 2026-09-23, so it is not over yet). [fact: measure.rows_after_end]

Why

Nothing in this data explains the changes above, and no outside context was attached. That is not the same as having no cause: the file records what happened, not why.

What's next

- A forecast of monthly rows in RentSafeTO-evaluation-view.csv was fitted but is not offered: it could only be checked against 6 replayed months of 39 months of history, too few to trust. [fact: forecast.monthly_rows.next,

forecast.monthly_rows.backtest.months, forecast.monthly_rows.history.months]

- A forecast of monthly total refused_items in RentSafeTO-evaluation-view.csv was fitted but is not offered: it could only be checked against 6 replayed months of 39 months of history, too few to trust. [fact: forecast.total_refused_items.next, forecast.total_refused_items.backtest.months, forecast.total_refused_items.history.months]

Do now

Nothing in this run was graded CONFIRMED or cleared for planning, so this brief recommends no action.

Watch

- Monitor: Change in the monthly total of refused_items, latest 12 months against the 12 before. Currently 68.81%. Not yet actionable. Gate: A 68.8% rise in the average month, latest 12 months against the 12 before, but no change test could be run: only 6 of the latest 12 months and 6 of the 12 before hold a usable value; the test needs at least 10 in each; the file holds no values for January, February, March, April, May in any year. Worth watching; not yet a confirmed change. What would settle it: This file holds no values for January, February, March, April, and May in any year, so a comparison of every month cannot run on this collection pattern, and waiting will not change that. What would settle it is comparing only the months that are sampled (June, July, August, September, October, November, and December) year against year, which this release does not run. [fact: measure.refused_items.total.change]
- Monitor: Change in the average month's row volume, latest 12 months against the 12 before. Currently 66.45%. Not yet actionable. Gate: A 66.4% rise in the average month, latest 12 months against the 12 before, but no change test could be run: only 8 of the latest 12 months and 6 of the 12 before hold a usable value; the test needs at least 10 in each; the file holds no values for January, February, March, April in any year. Worth watching; not yet a confirmed change. What would settle it: This file holds no values for January, February, March, and April in any year, so a comparison of every month cannot run on this collection pattern, and waiting will not change that. What would settle it is comparing only the months that are sampled (May, June, July, August, September, October, November, and December) year against year, which this release does not run. [fact: measure.volume.change_pct]
- Monitor: Change in the average month of refused_items, latest 12 months against the 12 before. Currently -0.18 refused_items. Not yet actionable. Gate: A difference of -0.175 refused_items in the average month, latest 12 months against the 12 before, over 3,272 rows, but some of its monthly averages in the two compared windows are at or below zero (they cross zero), so a percentage change, and a percentage bar, have no meaning for it, so no change test was run. Worth watching; not yet a confirmed change. What would settle it: No change test is available for this measure: some of its monthly averages in the two compared windows are at or below zero (they cross zero), so a percentage change, and a percentage bar, have no meaning for it. It would need a materiality bar in the measure's own units, which this release does not take, so it can be watched but not confirmed. [fact: measure.refused_items.change]
- Monitor: Change in the average month of paperwork_score, latest 12 months against the 12 before. Currently 2.9%. Not yet actionable. Gate: A 2.9% rise in the average month, latest 12 months against the 12 before, but no change test could be run: only 7 of the latest 12 months and 5 of the 12 before hold a usable value; the test needs at least 10 in each; the file holds no values for January, February, March, April, May in any year. Worth watching; not yet a confirmed change. What would settle it: This file holds no values for January, February, March, April, and May in any year, so a comparison of every month cannot run on this collection pattern, and waiting will not change that. What would settle it is comparing only the months that are sampled (June, July, August, September, October, November, and December) year against year, which this release does not run. [fact: measure.paperwork_score.change]
- Monitor: Change in the average month of waste_score, latest 12 months against the 12 before. Currently 2.22%. Not yet actionable. Gate: A 2.2% rise in the average month, latest 12 months against the 12 before, but no change test could be run: only 7 of the latest 12 months and 5 of the 12 before hold a usable value; the test

needs at least 10 in each; the file holds no values for January, February, March, April, May in any year. Worth watching; not yet a confirmed change. What would settle it: This file holds no values for January, February, March, April, and May in any year, so a comparison of every month cannot run on this collection pattern, and waiting will not change that. What would settle it is comparing only the months that are sampled (June, July, August, September, October, November, and December) year against year, which this release does not run. [fact: measure.waste_score.change]

- Plus 8 further signals on the watch list, not listed on this page.

What we cannot answer

- The data cannot support this claim: Forecast of monthly rows in RentSafeTO-evaluation-view.csv for 2026-09. Why: The method could only be replayed over 6 months, fewer than the 12 we require to judge it. What would settle it: A longer history, so at least 12 months can be held out. [fact: forecast.monthly_rows.next]
- The data cannot support this claim: Forecast of monthly total refused_items in RentSafeTO-evaluation-view.csv for 2026-09. Why: The method could only be replayed over 6 months, fewer than the 12 we require to judge it. What would settle it: A longer history, so at least 12 months can be held out. [fact: forecast.total_refused_items.next]

Every figure above carries its unit and a fact id. The full evidence trail -- the query or formula behind each figure, and whether it was re-run -- is in the full brief and the evidence ledger.
